Module 3 – 3NF Exercise

Below are the three tables created for the books database.

I have added an author_ID and a books_copy column to aid in looking up each copy. This makes it easier to update an author's information without messing with any linking and understand the difference between each book in case there are multiple in storage.

Publishers
publisher_ID
publisher_name
publisher_address

Authors
author_ID
author_phone
author_email
author_first_name
author_last_name
author_address

Books
book_isbn
book_copy
book_name
book_price
